EDUCATION

Polytechnic University of the Philippines – QC <i>Bachelor of Science in Information Technology</i>	Quezon City, Philippines <i>Oct 2022 – Oct 2026</i>
---	--

EXPERIENCE

Frontend Developer <i>Software Research Group – PUPQC</i>	2025 – 2026 <i>Quezon City, Philippines</i>
Vice President Research and Development <i>Commonwealth Information Technology – PUPQC</i>	2024 – 2025 <i>Quezon City, Philippines</i>
CommITs Creatives <i>Commonwealth Information Technology – PUPQC</i>	2024 – 2025 <i>Quezon City, Philippines</i>

PROJECTS

AI-Powered Ecommerce Platform (GFMIC) <i>Python Django Frontend Developer</i>	2024 – 2025
- Established the core user interface, building a solid, organized foundation that is fully responsive across all devices. - Developed essential features, including data exporting, favorites, and add-to-cart functionality to enhance system utility. - Implemented comprehensive field validations, ensuring accurate data entry and a secure, error-free user experience	
PUP Track Smart <i>React Django Frontend Developer</i>	2026
- Built the core interface with React.js, translating Figma prototypes into a solid, organized, and fully responsive design for all devices. - Engineered intuitive layouts and component pages to ensure clear navigation and high-clarity data that is easy to understand. - Collaborated to bridge design and code, ensuring every feature was functional, efficient, and matched the original plan perfectly.	
Yo Etz – AI Assisted Interview	2026
<i>Next typescript Django Postgres Meta-Llama-3-8B-Instruct LLM Frontend Developer</i> - Built the core interface with React.js, translating Figma prototypes into a solid, organized, and fully responsive design for all devices. - Engineered intuitive layouts and component pages to ensure clear navigation and high-clarity data that is easy to understand. - Collaborated to bridge design and code, ensuring every feature was functional, efficient, and matched the original plan perfectly.	
BitBo Portal <i>Python Django Frontend Developer</i>	2025
- Translated Figma prototypes into a solid, responsive design, adding interactive elements and high-quality visuals for all devices. - Engineered intuitive layouts and component pages to ensure clear navigation and high-clarity data that is easy to understand. - Collaborated directly with the team to continuously improve system quality, resulting in faster performance and a smoother user experience.	
Novella & Presenza <i>PHP Laravel Frontend Developer</i>	2024
- Directed the full development lifecycle for integrated Library and Attendance Management Systems, overseeing project scope, resource planning, and final core system logic. - Led the frontend implementation by transforming static prototypes into high-performance, responsive interfaces using modern frameworks and component-driven design. - Designed comprehensive Process Flows and System Flowcharts to translate complex user requirements into functional, error-free technical solutions. - Developed robust client-side field validations and state management to ensure system reliability and a seamless user experience. - Refined system navigation and component structure to improve load times and overall interface usability across all devices.	

CERTIFICATIONS

- mabl Skills Certification: Foundations - Certified Associate in Application Defense (PUP-CAAD) - Saylor Academy CS406: Information Security

TECHNICAL SKILLS

Design & Prototyping: Figma, Canva, Lucid, Draw.io
